

# DATA TALKS

## THE FUTURE OF TRANSPORTATION - NOW AND NEXT

- Why is transportation being disrupted so fast?
- What technological breakthroughs are transforming vehicles?
- Ownership vs transport as a platform, who will win and what does it mean for us?
- Join a panel of experts who will discuss micro-mobility, autonomous vehicles, urban planning, car sharing, smart roads, artificial intelligence and the new business models coming soon.

Petr Knap, EY - Partner Automotive & Transportation for Central, Eastern and Southeastern Europe, and Central Asia

Michal Illich, Founder and CEO Zuri.com the 1st Czech autonomous flying vehicle with vertical take off and landing

Jaromír Beránek, Chairman of the IT and Smart City Committee of the City of Prague

Matouš Kostlivý, Valeo - University Relations Specialist

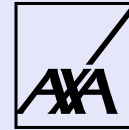

Vojtěch Fried, Head of Department Emobility & Smart City at Pražská energetika, a.s.

For whom: anybody who wants to understand better what kind of future is being built before our eyes. Come and join a non-technical conversation on The Future of Transportation.
